

CUBAN PERFINs

por Rudy Roy - C.P.C. 162

Two more of the Perfins listed in the April 1973 issue of the Bulletin have been identified by Mr. William McP Jones (CPC 100). He wrote to this writer, identifying the AC type as having been used by the American Club of Havana, and the CTC type as having been used by the Cuban Telephone Company. Of the 16 types now known, eight have been identified.

I have discovered two new types and a variety of another type. The new types are: A&C and N/P/T, and the variety is the D/U/N without the extra holes over and under the "U". Neither of the new types is identified.

In addition, B /N/C and C/T/C have been positively identified, from covers, as Banco Nacional de Cuba, and the Cuban Telephone Company, respectively.

If you can help in this area, please write to me at: E4 Perry Circle, Annapolis, Md. 21402. All letters promptly answered.
